

# Turn your personal laser printer into a fully functional network printer.

The JetDirect interface connects to your printer via the Parallel I/O port.

Use the HP JetDirect EX interface to connect parallel-based printers anywhere on an Ethernet or Token Ring LAN. Fully compliant with Novell Netware security features, the JetDirect features automatic network/protocol switching for simplified printing in mixed environments, with data transfer rates of up to 230 Kbps. Flash memory makes it easy to upgrade software over the network.

## COMPATIBILITY

- Expanded network operating system support:

Novell Netware 2.x, 3.x, 4.x

Windows NT

HP-UX, SunOs,

Microsoft LAN Manager

IBM LAN Server OS/2

SCO UNIX AIXX (TCP-IP),

Apple EtherTalk

## HP LAN PRINT SERVERS

DESCRIPTION	MFR. NO.	ORDER NO.	PRICE EACH
JETDIRECT EX ETHERNET PRINT SERVER	J23828	H2839PL	\$539.00
JETDIRECT EX TOKEN RING PRINT SERVER	J23838	H2840PL	609.00

# Lantronix lets many different protocols share printers.

Save money with Lantronix EPS-1, the networked print server that supports all five major protocols!

Office networks commonly become a patchwork of protocols.

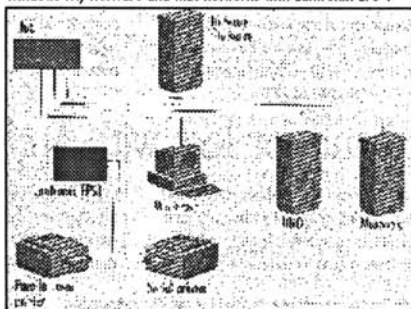

Our Lantronix print server supports the five most common protocols—and is easy to upgrade. Flash PROMS are standard, for downloadable software upgrades. It

supports both parallel and serial ports to allow up to two printers of almost any type. Its fantastic flexibility is matched only by its incredible, versatile size.

Serial and parallel printers print on combined Unix, VAX, Windows NT, NetWare and Mac networks with Lantronix EPS-1

## Features/Benefits

- F&B Supports NetWare (IPX), TCP/IP, Windows NT, AppleTalk and DEC LAT protocols
- EPS-1 supports 1 serial and 1 parallel printer.
- EPS-2 supports 1 serial and 2 parallel printers.

## LANTRONIX

DESCRIPTION	ORDER NO.	PRICE EACH
